

# New Innovative German Technology

## REVO Stone Products:

- REVOslate
- REVOnano
- REVOfite
- REVObond
- REVOnafa

## BENEFITS

- Real stone veneers for wall and other surface adhesion.
- Shipped with less cost than a traditional stone
- Can be bent to fit tight curves
- Creates a hard moisture barrier to water and impacts
- Can be cut with hand sheers for adhesion with a number of construction grade adhesives
- Most standard stone or wood sealers work well and enhance colors
- Saves installation labor by fast lay-up with no wet saw
- Easily laminated to other substrate
- Can be post grouted for any standard grout size
- Utilizing only what is needed from a stone quarry

# REVO Stone

Light, Flexible  
and Ultra Thin

The **REVO** product line is one of the most exciting innovations to come along in years

**The first stone a woodworker can process.**

FN Stone  
 575 Broadhollow Rd, Farmingdale, NY 11735

Light, flexible and very thin, these are the attributes for Stone Veneer. REVO stone is lightweight, flexible, colorful and unique stone veneer with unlimited application possibilities. The introduction of this exciting new material addresses a large need for a flexible, adaptable, durable and weather resistant stone veneer. REVO stone is so revolutionary that it can be adhered over any standard building surface with common construction adhesives.

REVOslate consists of thin layer of natural stone (front) and a polyester resin with glass fiber (backing). Veneer sheets are easily installed using standard woodworking tools and adhesives. No special stone mason skills are required.

### REVOslate

- 100% Natural Stone Cladding for any surface FLAT & CURVED
- It can be used on curved walls.
- 17 different colors and textures range
- Easy to handle and install
- Sizes Available : 24" x 48", 48" x 96" and 49" x 110"

### REVObond

REVObond bonds with 3M PE Foam Tape. It is an easy do-it-yourself installation. The sheets are incrementally sized to fit together like a puzzle.

### REVOnano

REVOnano is a real innovation with a total thickness of only 0.3 mm (0.012" - less than 1/64").

Despite its super thin slate thickness, the surface structure is still intact and is astonishing with its unsurpassed visual look and feel. The fleece backer reinforced from water-jet hardened fabric without any chemical binding agents is the actual thickness of the material.

As light as a feather and very flexible. It may be thermo-formed, three-dimensionally formed or wrapped and is suitable for post-forming applications with no problems. It will also conform to a radius as small as 2mm. The raw stone surface is protected against dust and damage by a silicon emulsion.

This fascinating THINLY CUT & LIGHTWEIGHT stone can be used in countless applications

### REVOnafa

It is REVOnano with leather backing.

### REVOlite

The panels have a translucent fiber glass backing which can be backlit for stunning colorful and effects similar to quartz.
